

DHARMIK PATEL

Data Science Professional

(+91) 6006484258 • pateldharmik202004@gmail.com • Ahmedabad, India
github.com/Dharmikpatel001 • [LinkedIn: Dharmik Patel](#)

PROFESSIONAL SUMMARY

Data Science graduate driven by solving complex business challenges through data. Specializes in building end-to-end machine learning pipelines and translating raw data into actionable strategies. Experienced in Python and SQL with a focus on delivering measurable improvements in operational efficiency.

TECHNICAL SKILLS

Programming & Libraries: Python (NumPy, Pandas, Matplotlib, Seaborn), SQL

Machine Learning: Scikit-learn, XGBoost, Random Forest, Linear Regression, Pipeline Design

Deep Learning & NLP: Deep Learning Fundamentals, Natural Language Processing

Data Analysis: Exploratory Data Analysis (EDA), Hypothesis Testing, Feature Engineering

Tools & Platforms: Streamlit, Microsoft Excel, Jupyter Notebook, Git/GitHub

EDUCATION

Data Science

Tops Technology, Ahmedabad • tops-int.com

Sep 2025 – Present

Bachelor of Science in Computer Science

KSV University, Gandhinagar, Gujarat • Grade: **9.18 CGPA**

Jul 2022 – Apr 2025

HSC (12th Board)

Sahajanand Vidyalaya, Ahmedabad • Grade: **64.31%**

Jun 2021 – Mar 2022

SSC (10th Board)

Sahajanand Vidyalaya • Grade: **79.16%**

Jun 2019 – Mar 2020

PROJECTS

House Price Prediction | Ames Housing Dataset

- Built an end-to-end ML model using XGBoost to predict house prices, achieving $R^2 = 0.928$
- Performed data preprocessing on 80+ features including missing value handling and categorical encoding
- Engineered key features such as Total Living Area, House Age, and Total Bathrooms to improve model accuracy
- Developed a leakage-free Scikit-learn pipeline with custom transformations for reproducible, production-ready training

GitHub: https://github.com/Dharmikpatel001/Projects/tree/main/ML/House_price_prediction

Real-Time Air Quality Index (AQI) Prediction & Monitoring System

- Built a Random Forest model to predict Air Quality Index (AQI) using key pollutants such as CO and Ozone
- Integrated live data using external APIs to evaluate model predictions on real-time environmental data
- Developed an interactive Streamlit web dashboard displaying AQI levels categorized into health bands (Good, Moderate, Poor)
- Designed the system to provide interpretable, real-time insights for air quality monitoring and decision-making

Live App: <https://aqi-detection.streamlit.app>

CERTIFICATIONS

The Data Science Course: Complete Data Science Bootcamp 2026

Udemy | Apr 2026

- Learned data analysis, visualization, and machine learning using Python (Pandas, NumPy, Scikit-learn)
- Built and evaluated models including Linear Regression and Random Forest using standard performance metrics
- Worked on real-world datasets — data cleaning, EDA, and basic SQL queries

Certificate: <https://github.com/Dharmikpatel001/Data-Science-TOPs-/tree/main/Certification>

The Data Analyst Course: Complete Data Analyst Bootcamp 2025

Udemy | Mar 2025

- Performed data cleaning, analysis, and visualization using Excel, SQL, and Python
- Applied exploratory data analysis (EDA) techniques to extract insights from real-world datasets
- Used SQL queries and data analysis techniques to support data-driven decision-making

Certificate: <https://github.com/Dharmikpatel001/Data-Science-TOPs-/tree/main/Certification>
