

Dharmik Patel

Date of birth: 2004/10/20 | **Nationality:** Indian | **Phone number:** (+91) 6006484258 (Mobile) |
Email address: pateldharmik202004@gmail.com | **Website:** <https://github.com/Dharmikpatel001> |
LinkedIn: [Dharmik Patel](#)

● ABOUT ME

Data Science graduate driven by solving complex business challenges through data. I specialize in building end-to-end machine learning pipelines and translating raw data into actionable strategies. Experienced in Python and SQL, with a focus on delivering measurable improvements in operational efficiency.

● EDUCATION AND TRAINING

2025/09/27 – CURRENT Ahmedabad, India
DATA SCIENCE Tops Technology

Website <http://tops-int.com/>

2022/07/17 – 2025/04/11 Gandhinagar, India
BACHELOR OF SCIENCE IN COMPUTER SCIENCE KSV University, Gandhinagar, Gujarat

Website <https://ksv.ac.in/> | **Field of study** Computer Science | **Final grade** 9.18

2021/06/01 – 2022/03/15 Ahmedabad, India
HSC(12TH) BOARD Sahajanand Vidhyalaya

Final grade 64.31

2019/06/10 – 2020/03/02 India
SSC(10TH) BOARD Sahajanand Vidhyalaya

Final grade 79.16

● SKILLS

Python - Numpy, Pandas | Matplotlib, seaborn | SQL | Hypothesis Tests | streamlit | Microsoft Excel | Machine Learning | Deep Learning | NLP

● PROJECTS

House Price Prediction (Ames Housing Dataset)

- Built an end-to-end ML model using **XGBoost** to predict house prices, achieving **R² = 0.928**.
- Performed data preprocessing on 80+ features, including **missing value handling and categorical encoding**
- Engineered key features such as **Total Living Area, House Age, and Total Bathrooms** to improve model accuracy
- Developed a **leakage-free scikit-learn pipeline** with custom transformations for reproducible and production-ready training

Link https://github.com/Dharmikpatel001/Projects/tree/main/ML/House_price_prediction

Real-Time Air Quality Index Prediction & Monitoring System

- Built a **Random Forest model** to predict Air Quality Index (AQI) using key pollutants such as CO and Ozone
- Integrated live data using external APIs to evaluate model predictions on **real-time environmental data**
- Developed an interactive **web dashboard** to display AQI levels and categorize them into health bands (Good, Moderate, Poor)
- Designed the system to provide **interpretable, real-time insights** for air quality monitoring and decision-making

● CERTIFICATIONS

udemy, 2026/04/27

The Data Science Course: Complete Data Science Bootcamp 2026

- Learned data analysis, visualization, and machine learning using Python (Pandas, NumPy, Scikit-learn).
- Built models like Linear Regression and Random Forest and evaluated them using standard metrics.
- Worked on real-world datasets and performed data cleaning, EDA, and basic SQL queries.

Mode of learning: Online

Link <https://github.com/Dharmikpatel001/Data-Science-TOPs-/tree/main/Certification>

udemy, 2025/03/10

The Data Analyst Course: Complete Data Analyst Bootcamp 2025

- Performed data cleaning, analysis, and visualization using Excel, SQL, and Python.
- Applied exploratory data analysis (EDA) techniques to extract insights from real-world datasets
- Used SQL queries and data analysis techniques to support data-driven decision-making.

Mode of learning: Online
